AMF classification: International equities

Objectives: The Fund is a passively managed index-based UCITS.

The Fund's objective is to track, both upwards and downwards, the performance of the MSCI Europe Net Total Return Index (net dividends reinvested) (the "Benchmark"), denominated in euro (EUR) and representative of large- and mid-cap companies from European developed markets, while minimising the tracking error between the Fund's performance and that of the Benchmark (the "Tracking Error").

The expected Tracking Error under normal market conditions is indicated in the Fund's prospectus.

The MSCI website (www.msci.com) contains more detailed information on the MSCI indices.

The Fund aims to achieve its objective through direct replication, namely by investing primarily in the components of the Benchmark.

In order to optimise Benchmark replication, the Fund may use a sampling technique as well as guaranteed temporary sales of securities.

Any use of these techniques is indicated on the website amundiETF.com.

The updated composition of the portfolio of securities held by the Fund is stated on the website amundiETF.com.

In addition, the indicative net asset value is shown on the Reuters and
